

The Sacred
Business
Manifesto

So you want to monetize your gifts that is the absolute best idea you have by far. the monetization is the simplest thing when you manifest two things into existence: who you want to help and what will you help them with. without manifesting those into existence you will continually feel like you are helping people you are out of alignment with as well like feeling overwhelmed, exhauste, and sadly you might think danm I can't produce the results I promise. How would you deliver your best self if you are serving everyone. Does everyone in the world needs healing work yes! Does everyone need your work? no! You are a unicorn and only unicorns you have soul contracts with will be your best clients even when they are difficult because they point out exactly what you the guide/leader needs to look at within yourself.

The Concept of a business manifesto is the first step into the creation of your business. It defines clearly what is tge intention behind your busines.

instructions: 1st read the pages of of this book do not write anything down
2nd grab your printed copy and find a quiet place
3rd: read the first prompt out loud then put your hand over your heart read it again: write down the first guidance that drops in and continue doing this for each questions
4th: Congratulations you did it you just create your heart centered business manifesto! Celebrate and take actions

Xx!
